Hand Hygiene Critical Control Points

1	**BEFORE PATIENT CONTACT**	**WHEN?** Clean and disinfect your hands before touching a patient.	
		WHY? To protect the patient against harmful bacteria carried on your hands.	
2	**BEFORE A SEPTIC TASK**	**WHEN?** Clean and disinfect your hands immediately before any septic task (and before wearing gloves).	
		WHY? To protect the patient against harmful bacteria from entering the body.	
3	**AFTER BODY FLUID EXPOSURE RISK**	**WHEN?** Clean and disinfect your hands immediately after an exposure risk to body fluids (& always after glove removal).	
		WHY? To protect yourself and prevent contamination of the healthcare environment.	
4	**AFTER PATIENT CONTACT**	**WHEN?** Clean and disinfect your hands after touching a patient and the immediate surroundings.	
		WHY? To protect yourself and prevent contamination of the healthcare environment.	
5	**AFTER CONTACT WITHPATIENT SURROUNDINGS**	**WHEN?** Clean and disinfect your hands after touching any object or furniture in the patient's immediate surroundings.	
		WHY? To protect yourself and prevent contamination of the healthcare environment.
